

## **Weapons Law - Recommendations for transportation and packaging**

In several countries, the relevant technical departments of the national federations of archery inform to care of transportation and packaging of bows, following the revisions to the Weapons Law.

In a quick summary:

The bows are now generally regarded as weapons.

It is recommended that those involved in sport to make a permanent monitoring of your identification card as archer from National Federations and accreditation.

When transported by car or public transport or on the road, bows should always be unarmed in the case of recurve bows, and without string, and placed inside the case itself. Transport, when possible, should be made so that in case of surveillance by the security forces, can not be a sudden or immediate use.

On the road, and especially in the moments between parking the car or out public transport, the most discreet and direct relationship between the location and access to the site custom.

In the case of control by the authority:

Avoid situations of conflict or discussion. In case of realizing intransigence on the part of law enforcement officer, not discuss. Request identification of the agent and follow the directions.

Above all, use common sense at all times.
